Microsoft Official Courses

Simpson Associates offer the following Microsoft Official Courses aimed at administrators, which come with certification training materials and are delivered by Microsoft Certified Trainers.

2008

Business Intelligence

- Course 6234A: Implementing and Maintaining Microsoft SQL Server 2008 Analysis Services
- Course 6235A: Implementing and Maintaining Microsoft SQL Server 2008 Integration Services
- Course 6236A: Implementing and Maintaining Microsoft SQL Server 2008 Reporting Services

Database Administration

- Course 6231A: Maintaining a Microsoft SQL Server 2008 Database
- Course 6317A: Upgrading Your SQL Server 2000 Database Administration (DBA) Skills to SQL Server 2008 DBA Skills
- Course 50400A: Designing, Optimizing, and Maintaining a Database Administrative Solution for Microsoft SQL Server 2008

Developer

- Course 2778A: Writing Queries Using Microsoft SQL Server 2008 Transact-SQL
- Course 6158C: Updating your SQL Server 2005 Skills to SQL Server 2008
- Course 6232A: Implementing a Microsoft SQL Server 2008 Database
- Course 50401A: Designing and Optimizing Database Solutions with Microsoft SQL Server 2008

2005

Business Intelligence

- Course 2791A: Implementing and Maintaining Microsoft SQL Server 2005 Analysis Services
- Course 2792A: Implementing and Maintaining Microsoft SQL Server 2005 Integration Services
- Course 2793A: Implementing and Maintaining Microsoft SQL Server 2005 Reporting Services
- Course 2794A: Designing a Business Intelligence Solution for the Enterprise Using Microsoft SQL Server 2005
- Course 2795A: Designing an ETL Solution Architecture Using Microsoft SQL Server 2005 Integration Services
- Course 2796A: Designing an Analysis Solution Architecture Using Microsoft SQL Server 2005 Analysis Services
- Course 2797A: Designing a Reporting Solution Architecture Using Microsoft SQL Server 2005 Reporting Services

Database Administration

- Course 2780B: Maintaining a Microsoft SQL Server 2005 Database

Developer

- Course 2779B: Implementing a Microsoft SQL Server 2005 Database
- Course 2784A: Tuning and Optimising Queries using Microsoft SQL Server 2005
- Course 2786B: Designing a Microsoft SQL Server 2005 Infrastructure
- Course 2787A: Designing Security for Microsoft SQL Server 2005
- Course 2788A: Designing High Availability Database Solutions Using Microsoft SQL Server 2005
- Course 2789B: Administering and Automating Microsoft SQL Server 2005 Databases and Servers
- Course 2790A: Troubleshooting and Optimising Database Servers Using Microsoft SQL Server 2005
- Course 50027A: Querying and Processing SQL Server Data Using Microsoft SQL Server

End User Courses: Microsoft Business Intelligence

Simpson Associates offer the following bespoke, Microsoft courses aimed at end users, which come with training materials and are delivered by experienced consultants.

Authoring Reports in Microsoft Report Builder 2.0

This course will provide participants with a fundamental understanding of the functionality available in Microsoft SQL Server Report Builder 2.0. This instructor-led course shows participants report building techniques using relational data models, and ways of enhancing, customizing, and managing professional reports. Attendees will participate in hands-on demos and workshops that illustrate key concepts, whilst learning how to use the product.

Authoring Reports in Microsoft Report Builder 3.0

This course will provide participants with a fundamental understanding of the functionality available in Microsoft SQL Server Report Builder 3.0. This instructor-led course shows participants report building techniques using relational data models, and ways of enhancing, customizing, and managing professional reports. Attendees will participate in hands-on demos and workshops that illustrate key concepts, whilst learning how to use the product.

Analysing Business Intelligence Data with Excel 2007

This course will provide participants with a fundamental understanding of the functionality available in Microsoft Excel 2007 and complimentary products. This instructor-led course shows participants analysis techniques using Microsoft SQL Server Analysis Services' cubes and ways of enhancing, customizing and managing information. Attendees will participate in hands-on demos and workshops that illustrate key concepts, whilst learning how to use the product.

Analysing Business Intelligence Data with Excel 2010

This course will provide participants with a fundamental understanding of the functionality available in Microsoft Excel 2010 and complimentary products. This instructor-led course shows participants analysis techniques using Microsoft SQL Server Analysis Services' cubes and ways of enhancing, customizing and managing information. Attendees will participate in hands-on demos and workshops that illustrate key concepts, whilst learning how to use the product.

Analysing Business Intelligence Data with Excel 2013

This course will provide participants with a fundamental understanding of the functionality available in Microsoft Excel 2013 and complimentary products. This instructor-led course shows participants analysis techniques using Microsoft SQL Server Analysis Services' cubes and ways of enhancing, customizing and managing information. Attendees will participate in hands-on demos and workshops that illustrate key concepts, whilst learning how to use the product.

Key Concept Courses

Data Warehousing

This workshop will introduce participants to the terms and techniques that are used in the design of a Data Mart or Data Warehouse, which will support complex management reporting requirements. The purpose of this workshop is to take participants with little to no background in Data Warehousing to a functional understanding of the business objectives and technical challenges that are involved in designing and building a Data Warehouse.

End User Courses
