

Power BI Training Course

Take your Power BI users from novices to pros in only 2 days

Our Microsoft Power BI training course is designed to take delegates from novices to advanced users over 2 days.

Get a end-to end view of Power BI

Learn how to Transform, Model, Visualise and share your data.

Discover DAX

Discover how you can use Data Analysis Expressions (DAX) to solve a number of basic calculation and data analysis problems.

Build your own dashboards

Work with your own data to build dashboards under the guidance of our experienced consultants.

80%

of delegates rate themselves as good or expert for competence levels in the tool following our training courses

Held in our York offices or a location of your choosing our Microsoft Power BI training course will teach your team how to use Power BI for simple data analysis situations as well as complex business intelligence scenarios.

Day 1

The first day of the training course is designed to give you an end-to-end view of Power BI. Over the duration of the 2 days you will learn about Power BI Desktop, Power BI Service, and components of Power BI including; Get and Transform (or Power Query), Modeling (or Power Pivot), Visualisation and Sharing. You will also learn about Power Query Formula Language, and DAX.

Day 2

Once you have completed all of the course activities and modules you will have the opportunity to put the teachings and activities into practice. Working with your own data we will guide your through building and sharing ready to use dashboards amongst your team, under the guidance of our experienced trainer.
