IBM Planning Analytics Training Courses

IBM Planning Analytics Model Building Principles-PAW

Learn how to build planning models on Workspace, the latest incarnation of TM1.

This course has been developed to give administrators the know-how on building financial models and includes modules that cover revenue planning, payroll planning, overheads and profit & loss. You will learn through many hands-on exercises the building blocks of modeling, pick up handy tips and good practices to follow.

No prior knowledge required; however, some business knowledge of your own organisation will be useful.

Duration: **3 Days** . Cost: **£4,500**

IBM Planning Analytics – Introduction to Design and Build Models in Performance Modeler

Learn how to build planning models on Performance Modeler.

This 3-day course has been developed to empower end users to build models and distribute to the larger audience via Contributor. Administrators will understand the fundamental building blocks, best practices, tips and techniques through hands-on exercises.

No prior knowledge required; however, some business knowledge of your own organisation will be useful.

Duration: **3 Days** . Cost: **£4,500**

IBM Planning Analytics for Excel (PAfE)

This 1-day training course is designed for the end user of Planning Analytics, particularly users responsible for analysing data and creating reports. The key software being used is IBM Planning Analytics for Excel (PAfE).

Key Topics covered:

- Getting to know the PA user interfaces
- Using cubes views
- Creating and understanding subsets
- Creating explorations
- Building different report types (Quick, Custom, List, Dynamic)
- Merging Excel functionality and true customisation of reports
- Utilising multiple hierarchies
- Publishing content

Duration: **1 Day** . Cost: **£1,500**

IBM Planning Analytics Workspace (PAW)

This 1-day course is focused on end users wanting to build and interact with highly visual and dynamic dashboards. This is for both consumers of content as well as the creators.

Key Topics covered:

- Overview of the Planning Analytics Workspace environment
- Manipulating cube views
- Using other objects within PAW
- Creating dashboards
- Themes
- Synchronisation
- Widgets
- Styles
- Visualisations
- Sharing content
- Applications and Plans

Duration: **1 Day** . Cost: **£1,500**

All prices stated are for up to 6 delegates and are exclusive of VAT. Courses may be delivered either virtually or in-person.

IBM Cognos Analytics Training Courses

IBM Cognos Analytics v11 Dashboard & Data Modeling Training

This training workshop introduces users to the exciting world of IBM Cognos Analytics 11, including a look into data modeling. During this full day training session you'll see how all users, from basic to advanced, can utilise one seamless, integrated interface and how all previous studios (Report Studio, Cognos Workspace Advanced, and Query Studio) have been re-engineered into one common but easily learned interface in IBM Cognos Analytics 11. We will also delve into data modeling, which will cover uploading files and creating a data module.

With thorough training and detailed, hands-on activities, we will show you how to get started quickly in IBM Cognos Analytics 11.

Duration: **1 Day** . Cost: **£1,500**

IBM Cognos Analytics v11 – Multidimensional Report Authoring

This instructor-led course teaches business analysts to navigate and analyse data in Analysis Studio. Trainees will learn techniques such as ranking, filtering, asymmetrical crosstabs, and graphing to help them analyse large volumes of data (whether OLAP or dimensionally modelled relational metadata).

Trainees will also learn to manage reports through Cognos Connection and will participate in hands-on demos and workshops that illustrate key concepts while learning how to use the product.

Duration: **1 Day** . Cost: **£1,500**

IBM Cognos Analytics v11 – Report Authoring

This instructor-led course will provide participants with report building techniques, enabling attendees to develop, enhance, customise and manage professional reports.

Trainees will work through hands-on demos and exercises to gain an understanding of techniques for enhancing, customising and managing reports.

Duration: **2 Days** . Cost: **£3,000**

IBM Cognos Analytics v11 – Administration

This course provides training to new administrators on the fundamental tasks of installing and configuring IBM Cognos Analytics, and administering servers and content in the environment. In the course, participants will install and configure the IBM Cognos Analytics software, implement security, and manage the server components. Students will also monitor and schedule tasks, create data sources, and manage and deploy content in the portal and IBM Cognos Administration.

Prior knowledge of Web application server architectures, security systems administration and some business knowledge of your organisation would be useful.

Duration: **1 Day** . Cost: **£1,500**

IBM Cognos Analytics v11 – Modeling

This course has been designed to give maximum learning and development capabilities to developers who are responsible for maintaining metadata models in Framework Manager. Throughout the course you will learn the design tools, techniques and security of modelling metadata from initial requirement gathering to publishing a package to the Web.

Duration: **1 Day** . Cost: **£1,500**

All prices stated are for up to 6 delegates and are exclusive of VAT. Courses may be delivered either virtually or in-person.
