Simpson Associates
The Data Analytics Company

Microsoft Power Platform Accelerator

Are you looking to transform your business with purpose-built apps, connecting teams and delivering innovative solutions? Simpson Associates have developed a head start solution that allows your organisation to embrace this technology.

At Simpson Associates, we empower organisations to achieve more by giving you an understanding of of how the Power Platform, including PowerApps, Power Automate and Power BI can be used to improve your business processes, create innovative experiences and get solutions quickly.

We have developed a head start accelerator that enables your organisation to get the components of the Power Platform up and running quickly. Our packaged offering will provide you with an understanding of the technology, explore the art of the possible, get the service commissioned, data connectivity setup and an application developed and deployed within a couple of weeks.

You may well have processes that rely on data stored in SharePoint, CRM, Office 365, Azure, Databases, Line of Business Systems, other cloud systems, with data stored on-premise or in the cloud. The Power Platform will allow you to access this data and build elegant solutions that connect teams and put information in the hands of the people that need it in a timely and accurate fashion.

What is included:

- Workshop – What is Power Apps
- Workshop – What is Power Automate?
- Commissioning of the service and security
- Installation of the Data Gateway to access on-premise data sources
- Definition of a business requirement to solve using Power Apps
- Development of an initial Power Platform solution
- Training and Handover

On completion of the engagement, you will have a working deployed Power Platform solution.

Pricing

The price of this solution starts at £12,000

"The Power Platform will allow you to access data and build elegant solutions that connect teams and put information in the hands of the people that need it in a timely and accurate fashion."
