Transforming

Digital Transformation in Healthcare

Free up time, communicate better, improve the patient experience

Political uncertainty, a growing and ageing population, and ever-evolving healthcare needs presents UK Healthcare organisations with many challenges.

In addition, a lack of investment and limited resources is placing more pressure on vital services and undermining patient care.

The Healthcare Landscape

7th
Largest employer in the world![1]

1.38M
Currently employed by the National Health Service.[1]

2024
Target to reach a core level of digitisation.[4]

314,000
More full-time equivalent NHS staff will be needed over & above existing vacancies by 2030/31.[2]

Key Challenges to new tech adoption

Survey of GP Practice Managers undercovered the next key challenges to new technology adoption by the NHS.

22% Security[3]

70% Funding[3]

70% Resources[3]

40% Knowledge[3]

Tech Challenges

Data Storage Issues
Outdated IT Systems not connected with other systems.[4]

Lack of Tech Experts
7,850 staff members in IT will be required by 2030.[5]

Delivering Interoperability
Many current systems are not consistent with interoperability[4]

Lack of buy-in from Key Stakeholders
IT experts struggling to get buy-in from senior executives
